

Greater Phoenix Area ChapterExcellence in Chapter Educational Programming

The Greater Phoenix Area Chapter is honored to have received AACN's Excellence in Chapter Educational Programming award, which reflects our dedication to advancing nursing education. After assessing members' needs, the chapter focused on kinesthetic learning, offering hands-on opportunities with critical care equipment. By partnering with local medical device representatives, we organized educational presentations and demonstrations. The chapter also sponsored chapter members to attend the National Teaching Institute & Critical Care Exposition and provided CCRN exam workshops. Monthly evaluations through surveys and feedback ensure that programs meet members' needs, enhance knowledge and improve patient care. Everyday topics and frequently used equipment were covered at vendor-hosted dinners. These initiatives have not only improved members' skills but also fostered a culture of lifelong learning. The chapter continues to prioritize education, adapting to the evolving needs of chapter members and the healthcare community.
