

New York City Chapter Excellence in Chapter Educational Programming

AACN's New York City Chapter, founded in 1972, aligns with National AACN's mission and vision. Embracing the chapter theme, Courageously Soaring Beyond Limits, we foster nursing excellence through diversity, inclusivity and lifelong learning. This year, we distributed scholarships for NTI, leadership and Challenges conferences, and offered programs on healthcare disparities and organ procurement. Using member input, we provided relevant education via dinners, interactive classes and Zoom events, enhancing participation. Community involvement included breast and stroke awareness events, and missions to Nigeria and Ghana. Our one-day conference covered topics such as bullying and incivility, imaging for patients with tattoos, sickle cell disease, stroke differential and rare endocrine syndromes, all aimed at enhancing nursing practice. The chapter remains committed to lifelong learning and excellence in patient care.
